

# Have you registered for a MiCores account yet?

Sign up today to continue using the Biomedical Research Store.

**IF these actions are not completed, you and your members will not be able to continue to use the Biomedical Research Store.**

## 1. Register for an Account.

Using your Uniqname and Level-1 password, create an account at: [umich.corefacilities.org](http://umich.corefacilities.org). (Please note: use your [@umich.edu](mailto:@umich.edu) **not** [@med.umich.edu](mailto:@med.umich.edu) email address, please.)

Follow the prompts to complete your registration.

About Core Facilities Search

MiCORES is an iLab Solutions system used by Biomedical Research Core Facilities (BRCF) to perform ordering, billing, and scheduling of scientific products and services. As of 8/9/2016, the following Cores are supported:

- Bioinformatics Core
- Epigenomics Core
- Flow Cytometry Core
- Metabolomics Core
- Microscopy & Image Analysis Laboratory
- Proteomics & Peptide Synthesis Core
- Sample Preservation Freezer (Freezer Farm)
- Transgenic Animal Model Core
- Vector Core

To login to MiCores, please click the green "login" button located at the top right side of this page.

### Need an iLab Account?

Click the blue "sign-up" button, located at the top right side of this page, to get started. All launched Core users are invited to use the system, which is accessible to University of Michigan faculty, staff, and students through your Uniqname and Level 1 (UMICH) password. Individuals associated with the University of Michigan without university credentials will need to obtain a [sponsored account](#) through the MCommunity Sponsor System managed by ITS. Please send a request to [msishelp@umich.edu](mailto:msishelp@umich.edu) for assistance obtaining a sponsored account.

Once you complete the one-time registration process and are approved by your PI or Lab Manager, the system will enable you to place service requests, provide required approvals, and monitor progress. Please note: users must also be approved into each core they would like to request services from. To register for an account, [follow these simple steps](#).

### Questions About MiCores?

MiCores is being supported by the HTS (Health Information Technology Services) Service Desk. If you have any questions pertaining to access or the system, please contact HTS by email at [msishelp@umich.edu](mailto:msishelp@umich.edu), by phone at 734-936-8000 or visit the [MiCores Knowledge Base](#) [\[link\]](#).

For scientific questions regarding services and available expertise, please contact the individual [Core](#) or [lrcf@umich.edu](mailto:lrcf@umich.edu).

## 2. All users must affiliate themselves with a Principal Investigator and/or lab.

After you register, you will request a lab affiliation by selecting a PI's name from the drop-down menu provided and submit the request. This needs to be approved by a lab manager or PI.

## Once your PI and/or Lab Manager has approved the

request and provided you with a shortcode, you will be able to continue placing orders with the Store.

## QUESTIONS?

Visit the MiCores Help Wiki at:
